## CLAIMS

- An aerosol product comprising a sealed metal
  canister containing an aerosol composition
  comprising an oxidase enzyme and a substrate for the
  enzyme.
- 2. An aerosol product is claimed in claim 1 wherein the aerosol composition additionally comprises catalase.
  - 3. An aerosol product as claimed in either claim 1 or claim 2 wherein the aerosol composition comprises >50 ppm of water.

15

- 4. An aerosol product as claimed in either claim 2 or claim 3 wherein the oxidase enzyme is glucose oxidase and the substrate is D-glucose.
- 20 5. A method of deoxygenating an aerosol product comprising filling an aerosol canister with an aerosol composition, an oxidase enzyme and a substrate for the oxidase enzyme and, in any order, filling the aerosol canister with propellant, and sealing the aerosol canister.
  - 6. A method as claimed in claim 5 wherein additionally a catalase is added to into the aerosol canister.
- 7. Use of an oxidase enzyme and a substrate for the oxidase enzyme as a corrosion inhibiting system for aerosol products.
- 8. Use of an oxidase enzyme and a substrate for the oxidase enzyme, as claimed in claim 7, in combination with the catalase.
